

Hunting Within BLM'S National Landscape Conservation System

The mission of the National Landscape Conservation System (NLCS), is to conserve, protect, and restore nationally significant landscapes recognized for their cultural, ecological, and scientific values for the benefit of the American public. Outstanding hunting opportunities are one of the benefits offered by this system.

The Conservation System offers outstanding opportunities for wildlife conservation including hunting a wide variety of large and small game species.

The NLCS includes a wide range of terrains – from Alaska to Southwestern deserts and from coastal to alpine environments.

- Challenging terrain.
- Challenging weather.
- Challenging species.

The NLCS offers unforgettable experiences for the novice and experienced hunter alike.

World-class Mountain Bighorn and Desert Bighorn Sheep, elk, pronghorn, mule deer, bear, moose, cougar, caribou, javelina, Hungarian and Chukar Partridge, grouse, waterfowl, and various furbearers, present one of the pre-eminent hunting opportunities for the American sportsman.
